White Hills Park Federation Nottingham

Mercury Technical Solutions Ltd - Testimonial

Mercury Technical Solutions Ltd

Have been installing audio visual equipment at the White Hills Park Federation family of schools for over three years. This has mainly comprised of the installation of projectors, security cages, and Interactive Whiteboards. During this time we have been more than happy with the quality of the installations, service and support we have received from them.

During 2009 they won a contract to install 18 LCD TV Screens and PCs across the Federation family of Feeder Primary Schools. We were impressed with Mercury's flexibility to accommodate the Primary Schools' individual requirements in both scheduling convenient times for installation and customising the installations to their bespoke requirements.
